

Invented in the USA

**MAGLOGIX®**

Made in Germany / USA

**NO OTHER MAGNET EVEN COMES CLOSE!**

**Maglogix® is awarded the People's Choice Award at the  
2018 US DOD Maintenance Symposium in Tampa Florida**

On December 18, 2018, at the Tampa Convention Center in Tampa Florida, the US DOD held its annual Maintenance Symposium. Nearly 100 companies showed off their newest products and technologies to assist the US Department of Defense in their mission to remain the most capable and effective fighting force on the globe. The men and women who keep all of this warfighting equipment and materiel mission-capable make up the Maintenance division, and approximately 1800 of these team leaders and Military Officers were on hand in Tampa to hear from a variety of speakers and to see the newest products.

74 of the companies in attendance submitted their products for possible inclusion in the Maintenance Innovation Challenge, and 6 were chosen for stage presentation where they explained their products and how the military can benefit from them. At the end, a panel of judges voted on the best military impact. While the attendees voted for their favorite.

Maglogix® was chosen for the People's Choice award! Our unmatched versatility across many aspects of fabrication, lifting, workholding, rapid attachment and our exclusive ability to not impact welding or electronics made Maglogix® the People's Choice!

Maglogix® is proud to be a small business partner with the US DOD, and to support our Military personnel at every level. We remain committed to enhancing safety and readiness with unique magnetic technology and innovation based in Parker, Colorado. We would like to thank all of our partners who have made us successful and all of the Military personnel who voted for us!
